

bloc

Featuring a single solid colour with a textured emboss, Polyflor Bloc PUR has a 0.70mm pigmented homogeneous PVC wear layer. A high performance, heavy duty heterogeneous sheet floorcovering with a polyurethane reinforcement, Bloc is ideally suited for use within the retail, leisure and commercial sector. The quality of a finished installation of Bloc is dependent upon the preparation of the subfloor which must be smooth. Also the frequency of a regular and well planned maintenance regime should be considered at the outset to ensure the plain floorcovering retains the optimum appearance.

- Polyflor Bloc PUR features a single solid colour with a textured emboss. The range incorporates a polyurethane reinforcement and combined with the superior closed surface finish, this enhanced protection allows the use of a polish-free maintenance regime. As with any plain material, the soil hiding properties are less than similarly coloured patterned floors. The frequency of a regular and well planned maintenance regime should be considered at the outset to ensure the plain floorcovering retains the optimum appearance. Careful consideration should also be given when choosing very light colours in highly trafficked areas.
- The following maintenance instructions are designed to maximise the benefits of the PUR, resulting in lower maintenance costs, without compromising the long-term appearance of your floorcovering.

INITIAL CONSTRUCTION CLEAN

- Remove all loose debris
- Ensure that all traces of adhesive are removed from the surface of the floorcovering
- Mop sweep or vacuum to remove dust and grit
- Damp mop with a neutral detergent
- If required, dry buff with a 1000 rpm plus rotary machine fitted with a suitable clean pad

ROUTINE MAINTENANCE

The following recommendations are provided as a guideline, and the frequency can be changed to optimise the appearance.

Daily

- Mop sweep or vacuum to remove dust and loose dirt
- If required, spot mop to remove stubborn marks, with a neutral cleanser

Weekly

Assess the appearance of the floor. Undertake the following as required:

- Scuffing - spray clean using a floor maintainer and 1000 rpm plus rotary machine fitted with a suitable clean pad

Periodically

Assess the appearance of the floor.

- If the floor has dirt build-up, machine scrub with a scrubber dryer (approx. 165 rpm) fitted with a suitable clean pad, using a neutral or alkaline detergent, as appropriate
- Rinse thoroughly and allow to dry
- Dry buff to restore finish*

- This maintenance regime requires the installation of a robust and effective barrier matting system
- Cleaners and detergents should be diluted as per the manufacturers' instructions. For recommended products, see the Polyflor Approved Maintenance Products sheet
- Always follow the Health and Safety guidance provided, and dilute cleaners and detergents in accordance with the manufacturers' instructions
- Fit protective feet to table and chair legs, to prevent scratching
- Polyflor Bloc PUR is suitable for steam cleaning on a periodic basis
- These maintenance instructions are intended for the PUR Range of floorcoverings, which have a polyurethane reinforcement. For other Polyflor products, reference should be made to their specific floorcare sheets
- Note: In most instances, the above maintenance regime will be sufficient to ensure your floorcovering retains the optimum appearance. Should you wish to provide extra protection in heavily trafficked areas, or where no mechanical means exist to maintain the product, a matt floor polish should be applied.
- *The frequency of a regular and well planned maintenance regime should be considered at the outset. Details of the procedure to be used can be found in the Polyflor Technical Information Manual. For a copy, or further information, contact Polyflor Customer Technical Services on +44 (0)161 767 1912, or email tech@polyflor.com.
- At the date of issue the data presented is correct.
- However, Polyflor Ltd. reserve the right to make changes which do not adversely affect performance or quality.

REGULAR CLEANING IS MORE BENEFICIAL TO THE FLOORCOVERING AND MORE COST-EFFECTIVE THAN OCCASIONAL HEAVY CLEANING.

APPROVED MAINTENANCE PRODUCTS

The companies listed have products that are approved for use with Polyflor products. For full instructions for use, and health and safety guidelines, please contact the manufacturer.
