

Office

Active Office Swansea, UK

PRODUCTS USED:

Polysafe Hydro Evolve, Expona Flow PUR
and Polysafe Arena

Designed by SPECIFIC, a UK innovation and knowledge centre led by Swansea University, the Active Office will be the UK's first energy positive building, generating more energy than it uses over the course of a year.

Manufactured and delivered by offsite specialists Wernick Buildings the office features integrated solar cells in the curved roof, lithium-ion batteries to store electricity and a 2,000-litre water tank to store solar heat. Polyflor products chosen for the build included Polysafe Hydro Evolve, Expona Flow PUR and Polysafe Arena.

In keeping with the energy positive nature of the build, all the Expona Flow PUR, Polysafe Arena PUR and Polysafe Hydro Evolve fitted on site is 100% recyclable and achieves an A+ BRE rating.

Robert Townsend, Key Account Manager at Wernick commented, "Our aim for this project was to provide a high-quality finish and be as sustainable as possible in every aspect of the building. Polyflor's products were the perfect match for this brief."
