# Ejecta

The Ejecta range of flooring accessories are PVC profiles which are ideal for use with the Polyflor range of products. They include coved skirtings that are fitted before the flooring is laid and can be welded to provide a secure joint (set-in) or after, to provide a neat finish (sit-on). Sheet flooring may be taken up the wall having created a radius using a cove former and capping strip ensures a continuous sealed surface. The benefits of a sealed, easily maintained surface are invaluable in hospitals and other similar locations where hygiene is of paramount importance.
